

9. Create Dataset Using ARFF

Steps

1. Open **Notepad**.
2. Write the ARFF header:
3. Save as: student.arff
4. Open **WEKA**.
5. Click **Explorer**.
6. Click **Preprocess**.
7. Click **Open file**.
8. Select student.arff.
9. Check that the attributes and instances appear.

Programming code : shopping.arff

OUTPUT :

The screenshot shows the Weka Explorer interface with the 'Associate' tab selected. The 'Apriori' algorithm is chosen with the following command: `Apriori -N 10 -T 0 -C 0.6 -D 0.05 -U 1.0 -M 0.3333 -S -1.0 -c -1`. The 'Associator output' pane displays the results of the Apriori algorithm, including the minimum support (0.55), minimum confidence (0.6), and a list of 9 best rules found.
